

# OPERATION, PARTS AND SAFETY MANUAL

## **SIGNODE®**

**D-34**

**MANUAL SEALER**

**IMPORTANT!**  
**DO NOT DESTROY**

It is the customer's responsibility to have all operators and servicemen read and understand this manual.

Contact your local Signode representative for additional copies of this manual.

***READ ALL INSTRUCTIONS BEFORE OPERATING THIS SIGNODE PRODUCT***

---

---

# **⚠️ WARNING**

READ THESE INSTRUCTIONS CAREFULLY.

FAILURE TO FOLLOW THESE INSTRUCTIONS CAN RESULT IN SERIOUS PERSONAL INJURY.

## **GENERAL SAFETY CONSIDERATIONS**

### **1. STRAP BREAKAGE HAZARD.**

Improper operation of the tool or sharp corners on the load can result in strap breakage during tensioning, which could result in the following:

- A sudden loss of balance causing you to fall.
- Both tool and strap flying violently towards your face.

Failure to place the strap properly around the load or an unstable or shifted load could result in a sudden loss of strap tension during tensioning. This could result in a sudden loss of balance causing you to fall.

Read the tool's operating instructions. If the load corners are sharp use edge protectors. Place the strap correctly around a properly positioned load.

- Positioning yourself in-line with the strap, during tensioning and sealing, can result in serious personal injury from flying strap or tool. When tensioning or sealing, position yourself to one side of the strap and keep all bystanders away.

### **2. TRAINING.**

This tool must not be used by persons not properly trained in its use. Be certain that you receive proper training from your employer. If you have any questions contact your Signode Representative.

### **3. EYE INJURY HAZARD.**

Failure to wear safety glasses with side shields can result in serious eye injury or blindness. Always wear safety glasses with side shields which conform to ANSI Standard Z87.1 or EN 166.

### **4. FALL HAZARD.**

Maintaining improper footing and/or balance when operating the tool can cause you to fall. Do not use the tool when you are in an awkward position.

### **5. CUT HAZARD.**

Handling strap or sharp parts could result in cut hands or fingers. Wear protective gloves.

### **6. TOOL CARE.**

Take good care of the tool. Inspect and clean it daily, lubricate it weekly and adjust when necessary. Replace any worn or broken parts.

### **7. WORK AREA.**

Keep work areas uncluttered and well lighted.

# **⚠ WARNING**

Use the correct Signode products for your application. If you need help contact your Signode Representative.

*Signode tools and machines are designed and warranted to work together with Signode strapping and seals. Use of non-Signode strap, seals and/or manufactured or specified replacement parts may result in strap breakage or joint separation while applying strapping to a load or during normal shipping and handling. This could result in serious personal injury.*

## **SAFETY PROCEDURES FOR TOOL OPERATION**

### **1. OPERATION SEQUENCE.**

Before using this tool, read its Operation and Safety Instructions contained in this manual.

2. This tool is a double crimp type sealer. A properly formed joint will appear as shown in the illustration. An improperly formed seal which does not have two good crimps could result in strap separation which can result in serious personal injury or death. If the joint does not appear as shown, then the operator must proceed as follows:

- A. Ensure that the tool's operating instructions are being followed before applying another strap.
- B. Cut the strap off and apply another.

If the joint still does not appear as shown, then inspect the tool for worn and/or damaged parts. Replace tool parts as needed. **BEFORE MOVING ANY PACKAGE BE CERTAIN THAT THE SEAL IS FORMED WITH TWO GOOD CRIMPS AS SHOWN.** Misformed joints may not secure the load and could cause serious injury.

3. Tuck strap end back into the dispenser when not in use.

## **CUTTING TENSIONED STRAP**

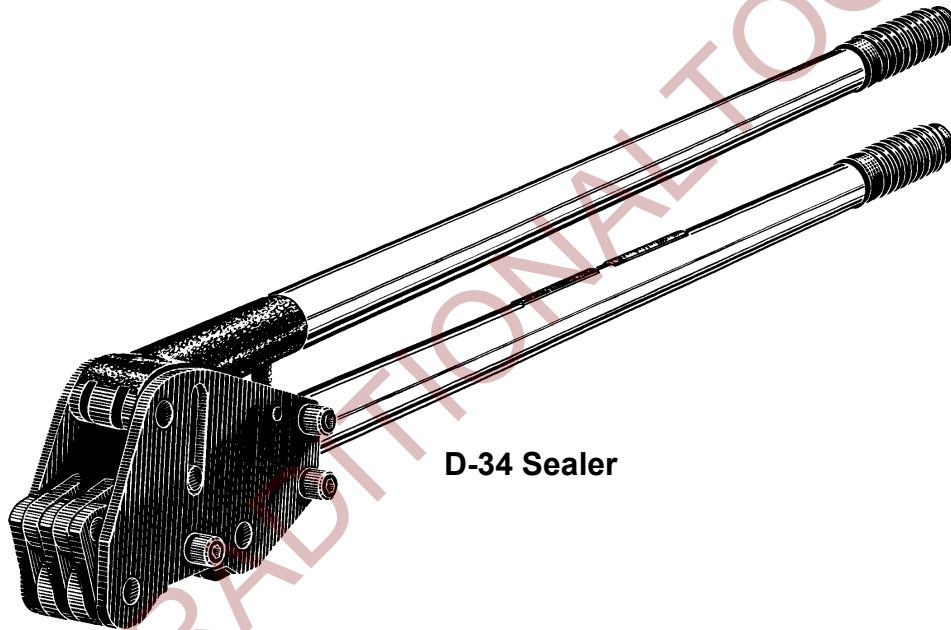

### **FLYING STRAP HAZARD.**

Using claw hammers, crowbars, chisels, axes or similar tools will cause tensioned strap to fly apart with hazardous force. Use only cutters designed for cutting strap. Read the instructions in the cutters manual for proper procedure in cutting strap. Before using any Signode product read its Operation and Safety Manual.

**⚠ WARNING**

Signode tools and machines are designed and warranted to work together with Signode strapping and seals. Use of non-Signode strap, seals and/or manufactured or specified replacement parts may result in strap breakage or joint separation while applying strapping to a load or during normal shipping and handling. This could result in serious personal injury.

**D-34 Sealer**

**TOOL SPECIFICATIONS**

MODEL	TYPE	STRAP		SEALS
		WIDTH	THICKNESS	
D-34	Tenax 2225	3/4" (19mm)	.050" to .060" (1.27-1.54mm)	34DY

## OPERATING INSTRUCTIONS

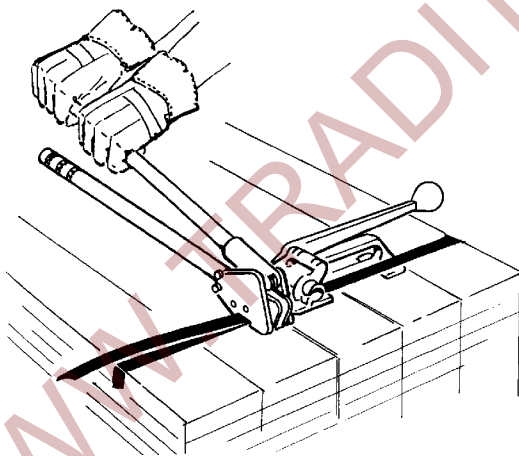

### **⚠ WARNING**

Wear safety glasses which conform to ANSI Standard Z87.1 or EN 166. Stand to one side of the tensioned strap while sealing. Maintain proper footing and balance. Make sure all bystanders are clear before proceeding.

1. Fully open sealer handles and center the open jaws on the seal.

2. Bring sealer handles completely together to assure a proper notch.

3. Remove sealer and inspect strap joint for proper formation. Cut strap end with cutter placed close to seal.
4. To avoid contact with sharp end of strap, retract strap end back into strap dispenser.

### JOINT INSPECTION

This tool is a double crimp type sealer. A properly formed joint will appear as shown in the illustration. An improperly formed seal which does not have two good crimps could result in strap separation which can result in serious personal injury or death. If the joint does not appear as shown, then the operator must proceed as follows:

- A. Ensure that the tool's operating instructions are being followed before applying another strap.
- B. Cut the strap off and apply another.

If the joint still does not appear as shown, then inspect the tool for worn and/or damaged parts. Replace tool parts as needed. **BEFORE MOVING ANY PACKAGE BE CERTAIN THAT THE SEAL IS FORMED WITH TWO GOOD CRIMPS AS SHOWN.** Misformed joints may not secure the load and could cause serious injury.

### TOOL MAINTENANCE

1. Clean the tool and apply light machine oil to all moving parts on a weekly basis.
2. Inspect the tool before each use for worn or broken parts. Replace parts if necessary.

## D-34, PARTS LIST

<u>KEY</u>	<u>QTY.</u>	<u>PART NO.</u>	<u>DESCRIPTION</u>
1	3	020370	SHCS, 5/16-24 x 2 1/16
2	2	<u>424401</u>	<u>Side plate</u>
3	2	020378	Handle grip
4	3	<u>020366</u>	<u>Jaw pin</u>
5	2	424406	Spacer
6	6	<u>424402</u>	<u>Jaw</u>
7	2	<u>020361</u>	<u>Toggle link pin</u>
8	1	424403	Crimper
9	2	<u>424405</u>	<u>Front link</u>
